

CONSTANT-AIR- PRESSURE PLAY INFLATABLES

Silent Bounce

Introduction

The New Generation of Noise-Free Recreation

Modern family venues, hotels, and entertainment centers are increasingly looking for attractions that not only attract guests but also provide comfort, safety, and aesthetics that complement contemporary spaces.

At SilentBounce, we believe the future of the industry belongs to constant-air-pressure inflatables – innovative attractions that eliminate one of the biggest drawbacks of traditional inflatables: the continuous noise generated by air blowers.

Thanks to constant-air-pressure technology, our inflatables remain quiet, safe, and comfortable, creating an enjoyable environment for both children and guests relaxing nearby.

This solution makes it possible to create a modern play area that:

- enhances the attractiveness of the venue,
- improves guest comfort,
- aligns with premium hospitality standards,
- can be installed both indoors and outdoors.

Constant-air-pressure inflatables represent the next generation of family entertainment — quieter, more comfortable, and designed for modern spaces.

Why Is It Worth It?

Investing in a constant-air-pressure inflatable attraction is one of the most profitable business models in the recreation industry.

Our data shows that:

Profitability: Investors can achieve returns ranging from 250% to as much as 266% within the very first season of operation.

Increased Occupancy: Accommodation facilities report an average 35%–40% increase in bookings after introducing an Inflaa attraction to their offering.

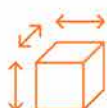

Cost Efficiency: Low operating costs and the absence of any need for permanent construction make it possible to transform underutilized spaces into revenue-generating assets. Whether installed indoors or outdoors—on grass, concrete, or sand—these attractions turn unused areas into profitable entertainment zones.

IAT-1

4280,00 EURO

Key Specifications

Dimensions: 12 x 3,5 x 2,3 m

Material: PVC Tarpaulin 0.9 mm

Safety: CE certified, lead-free material

Included in the package:

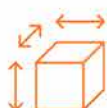

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

IAT-2

4580,00 EURO

Key Specifications

Dimensions: 5,5 x 5 x 2,3 m

Material: PVC Tarpaulin 0.9 mm

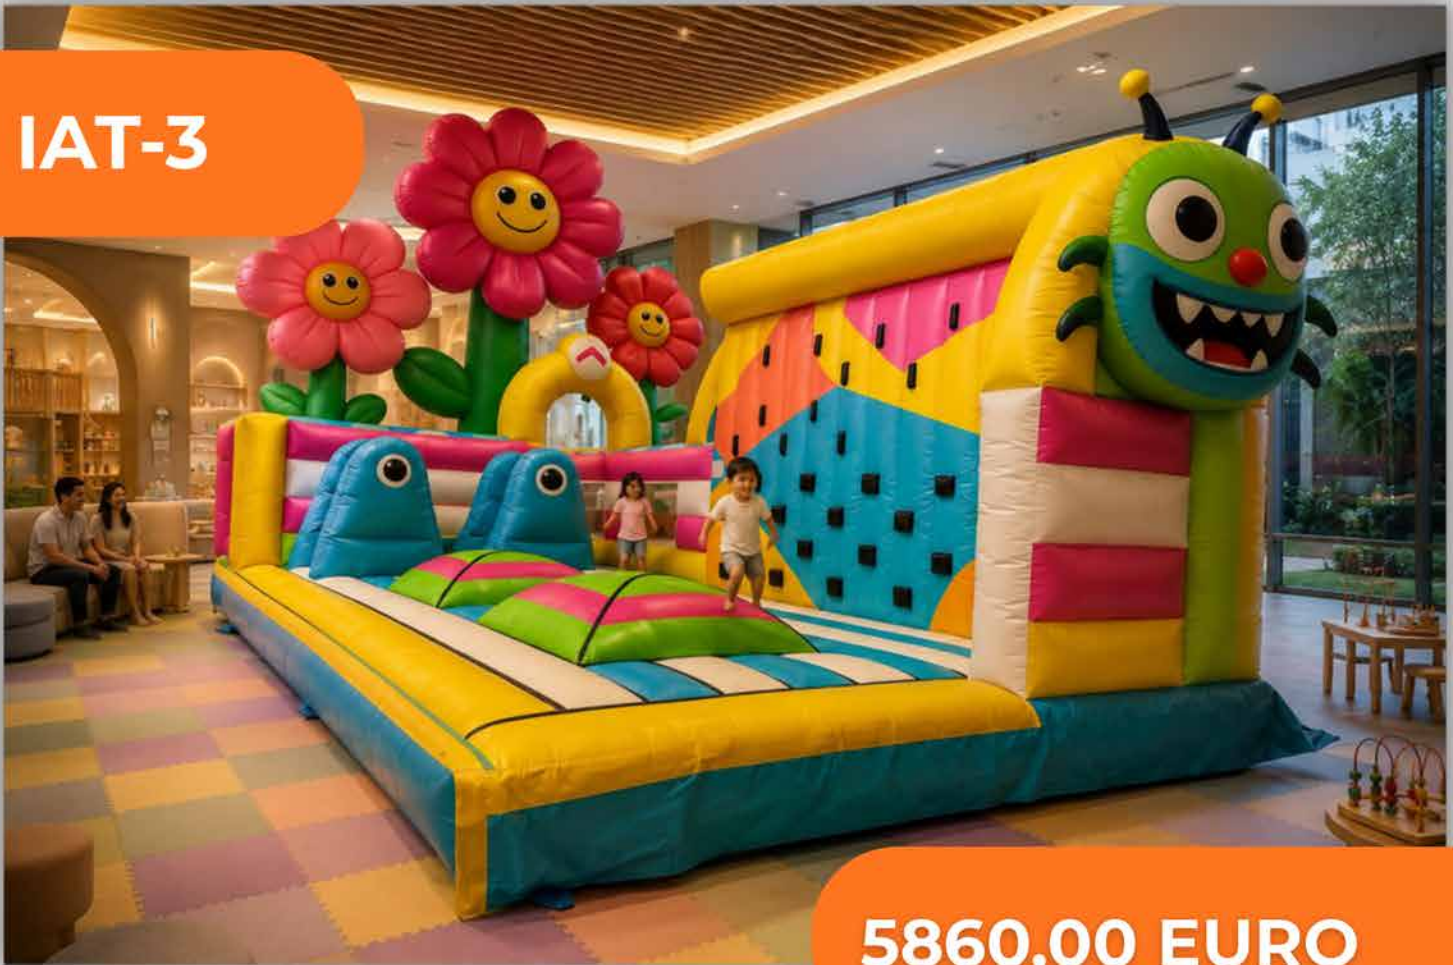

Safety: CE certified, lead-free material

Included in the package:

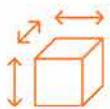

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

IAT-3

5860,00 EURO

Key Specifications

Dimenisons: 8 x 4 x 3.5 m

Material: PVC Tarpaulin 0.9 mm

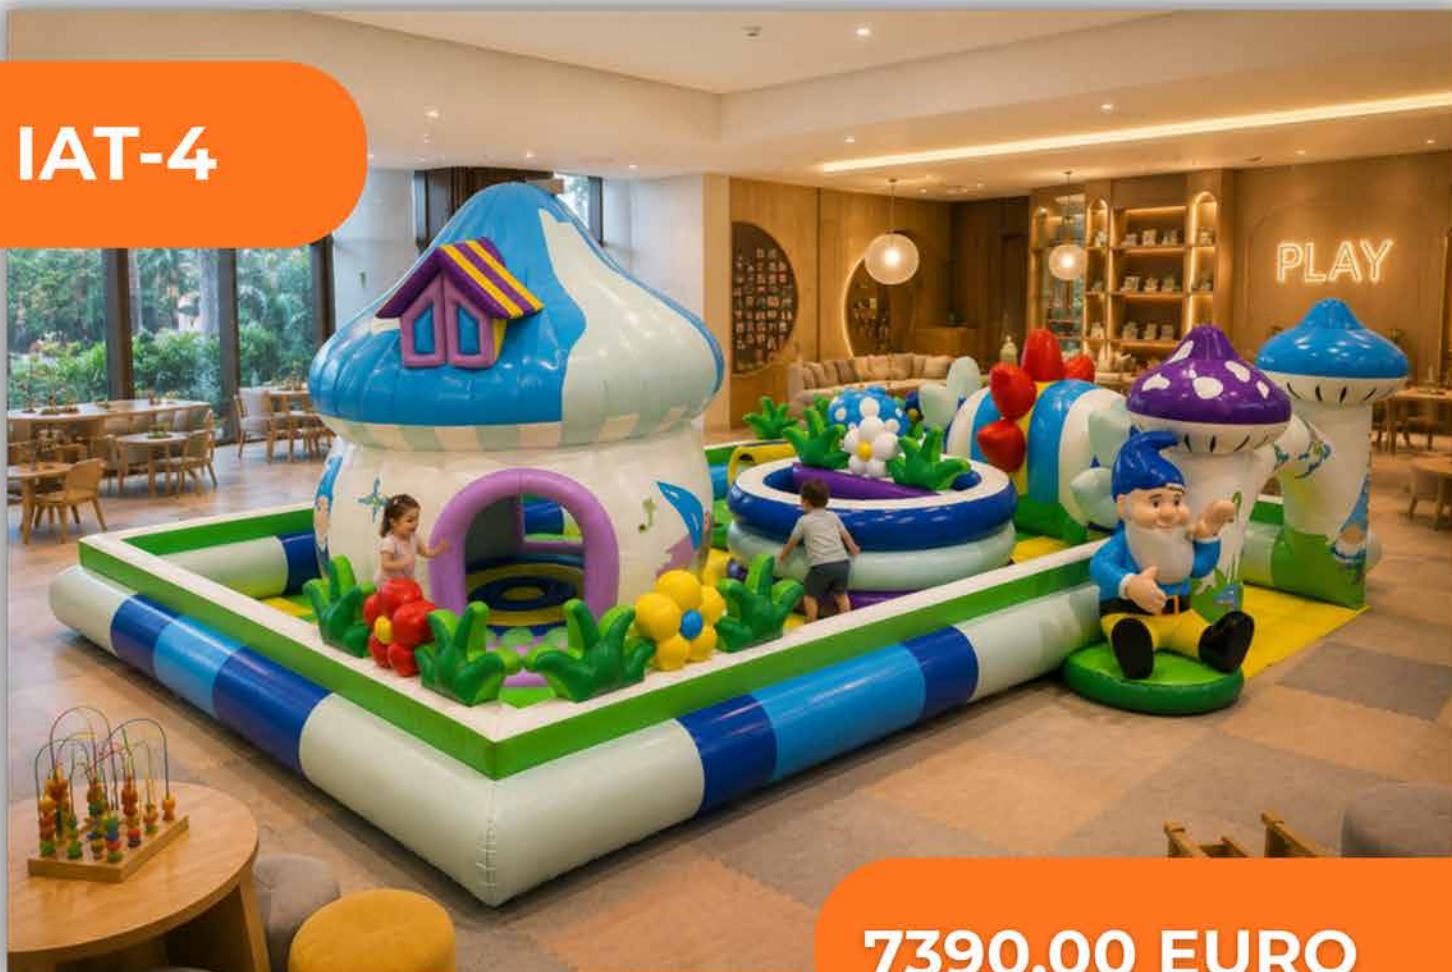

Safety: CE certified, lead-free material

Included in the package:

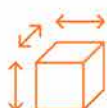

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

IAT-4

7390,00 EURO

Key Specifications

Dimensions: 10 x 6 x 3 m

Material: PVC Tarpaulin 0.9 mm

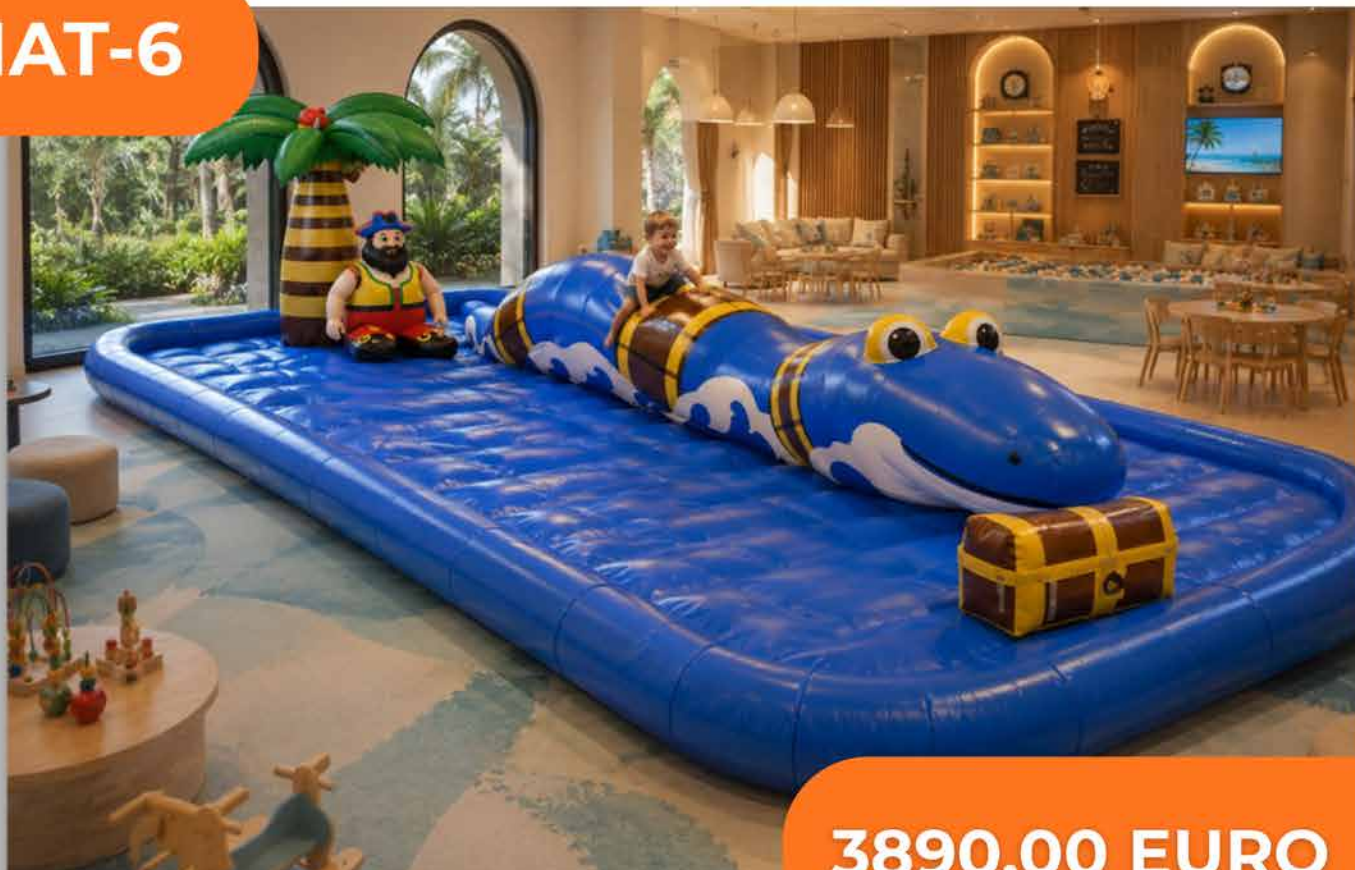

Safety: CE certified, lead-free material

Included in the package:

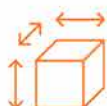

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

IAT-6

3890,00 EURO

Key Specifications

Dimensions: 8 x 3 x 2 m

Material: PVC Tarpaulin 0.9 mm

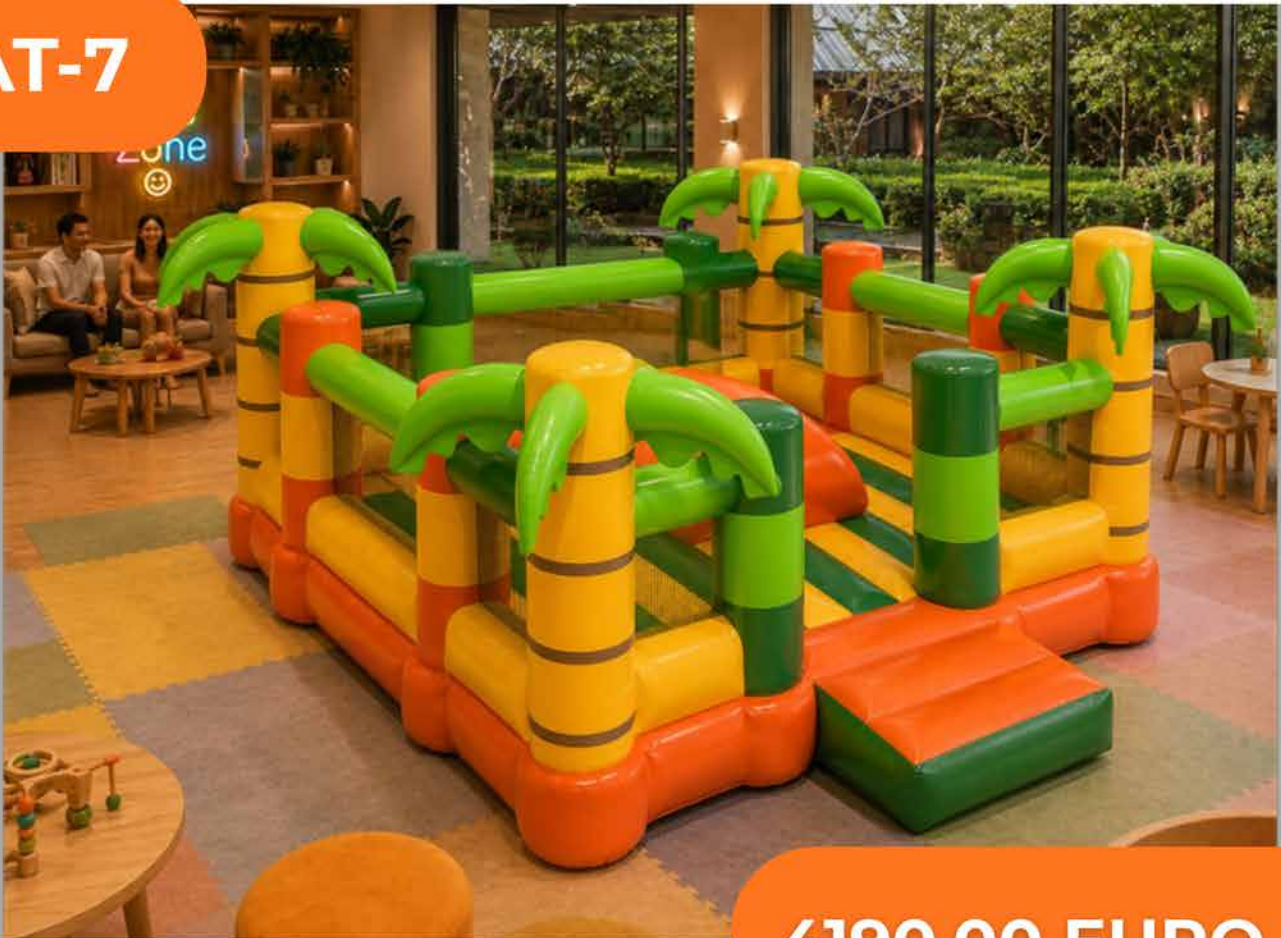

Safety: CE certified, lead-free material

Included in the package:

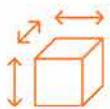

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

IAT-7

4190,00 EURO

Key Specifications

Dimensions: 5 x 4 x 2,1 m

Material: PVC Tarpaulin 0.9 mm

Safety: CE certified, lead-free material

Included in the package:

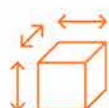

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

IAT-8

1790,00 EURO

Key Specifications

Dimensions: 3 x 2 x 2 m

Material: PVC Tarpaulin 0.9 mm

Safety: CE certified, lead-free material

Included in the package:

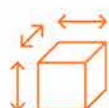

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

IAT-9

4350,00 EURO

Key Specifications

Dimensions: 6 x 5 x 3,5 m

Material: PVC Tarpaulin 0.9 mm

Safety: CE certified, lead-free material

Included in the package:

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

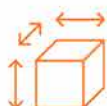

IAT-10

5980,00 EURO

Key Specifications

Dimensions: 6,5 x 6,5 x 3,5 m

Material: PVC Tarpaulin 0.9 mm

Safety: CE certified, lead-free material

Included in the package:

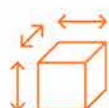

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

IAT-11

Key Specifications

3290,00 EURO

Dimensions: 5 x 3,5 x 3,2 m

Material: PVC Tarpaulin 0.9 mm

Safety: CE certified, lead-free material

Included in the package:

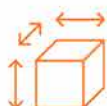

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

IAT-12

2890,00 EURO

Key Specifications

Dimensions: 3 x 3 x 2,5 m

Material: PVC Tarpaulin 0.9 mm

Safety: CE certified, lead-free material

Included in the package:

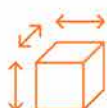

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

IAT-14

Key Specifications

2890,00 EURO

Dimensions: 3 x 3 x 2,5 m

Material: PVC Tarpaulin 0.9 mm

Safety: CE certified, lead-free material

Included in the package:

- ✓ Electric air pump for inflation
- ✓ Pressure gauge for monitoring air pressure
- ✓ Repair kit for quick and easy maintenance
- ✓ EU Declaration of Conformity (European Union)
- ✓ Transport bag for convenient storage and transportation of the inflatable equipment.

Safety and Peace of Mind

Regulatory requirements are often one of the biggest concerns for investors.

SilentBounce inflatables are supplied with a Manufacturer's CE Declaration of Conformity, allowing them to be used throughout Europe.

With certified products and compliance documentation included, you can focus on growing your business while ensuring a safe and reliable experience for your guests.

Flexibility and Implementation Process

Time is money, which is why the SilentBounce implementation process is designed for speed and efficiency.

- **Consultation & Planning:**

We begin with a detailed analysis of your needs and a preliminary project concept. We also offer a wide range of standard inflatable designs suitable for various indoor and outdoor spaces.

- **3D Design & Quotation:**

In addition to standard models, we can create fully customized products tailored to any theme or concept. Every project includes a detailed 3D visualization and a comprehensive cost estimate.

- **Production:**

Depending on the complexity of the project, manufacturing takes between 14 and 140 days.

- **Installation Training & Operational Guidance:**

A SilentBounce inflatable can be installed in less than one hour. We provide full training for your staff covering setup, operation, and maintenance procedures.

- **24/7 Support:**

Our team remains available for ongoing technical assistance and after-sales service whenever you need it.

Constant-Air-Pressure Inflatables – The Future of Family Entertainment

Constant-air-pressure inflatables are the ideal solution for modern hotels, indoor playgrounds, entertainment centers, and family-oriented venues looking to offer engaging attractions without the noise typically associated with traditional inflatables.

Thanks to innovative constant-air-pressure technology, the structures remain soft, stable, and continuously inflated, providing a comfortable user experience, an attractive appearance, and a pleasant environment for both guests and staff.

Our solutions are suitable for both indoor and outdoor installations, helping venues stand out from the competition while creating memorable experiences that encourage guests to return.

Would you like to discover how constant-air-pressure inflatables can enhance the appeal of your venue and create new revenue opportunities?
